PROFESSIONAL SUMMARY

Available for immediate joining.

Software Engineer with 3+ years of experience in Backend Development and Full Stack Development, building scalable applications across food delivery and fintech domains using NestJS, Node.js, Express.js, TypeScript, JavaScript, React.js, PostgreSQL, MongoDB, Redis, Docker, AWS, Azure, GitHub Actions, and CI/CD pipelines.

Strong hands-on experience designing REST APIs, microservices, database migrations, SQL optimization, JWT/OAuth authentication, authorization, API integrations, Socket.IO real-time systems, payment gateway workflows, cloud deployment, and performance optimization for production-grade platforms.

EXPERIENCE

Zenzio Technologies - Backend Developer

Apr 2026 - Present

Puducherry, India

- Architected and built the backend from scratch for a multi-platform food delivery ecosystem covering Customer App, Restaurant App, Delivery Executive App, and Admin Portal using NestJS, TypeScript, Python, PostgreSQL, and Socket.IO, enabling launch from zero production orders to daily customer transactions.
- Designed 100+ REST APIs and backend modules using NestJS, Python, and PostgreSQL for authentication, authorization, JWT sessions, restaurant catalog, order management, delivery assignment, pricing, offers, coupons, notifications, banners, analytics, and admin operations, reducing feature delivery cycle time by 30%.
- Implemented real-time order tracking and live delivery status workflows using Socket.IO and event-driven backend design to synchronize customers, restaurant partners, and delivery executives with sub-second updates.
- Optimized PostgreSQL schemas, indexes, migrations, and SQL query plans using pgAdmin and Prisma-style data modeling to support high-volume order processing, improving API response time by 35%.
- Integrated internal services, notification workflows, payment gateway flows, and third-party REST APIs with secure backend business logic, improving order completion reliability across production releases.
- Managed Docker-based deployments, GitHub Actions CI/CD pipelines, Azure services, and AWS cloud infrastructure to support frequent production deployments and scalable cloud operations.
- Improved backend performance by resolving production issues, tuning database access patterns, and reducing heavy API payloads, cutting repeated production incidents by 25%.
- Developed React.js Admin Portal modules connected to backend APIs, enabling operations teams to manage restaurants, orders, delivery users, offers, banners, and platform analytics from a single interface.

HDFC ERGO - Full Stack Developer

May 2025 - Nov 2025

Bhandup, Mumbai

- Developed REST API endpoints and backend modules for digital KYC onboarding workflows using Node.js, Express.js, Python, and SQL-based data access patterns, reducing customer onboarding turnaround time by 25%.
- Integrated internal customer profile, document processing, and policy services through secure REST APIs, Python utilities, and structured business logic, improving onboarding workflow efficiency by 20%.
- Implemented authentication, authorization, role-based access, and JWT-driven session handling for backend services to strengthen secure access across onboarding journeys.
- Designed database schema changes, migration scripts, and optimized SQL queries for onboarding records, improving data retrieval performance by 30%.
- Resolved production backend issues across API handlers, service integrations, and database queries, improving successful customer journey completion by 20%.
- Supported CI/CD release workflows, deployment readiness, and environment configuration for backend services, helping teams deliver production updates ahead of planned timelines.

Niyogin Fintech Ltd - Full-Stack Web Developer

May 2023 - Apr 2025

Vidyavihar, Mumbai

- Developed full-stack product features for the Niyoblu loan platform using React.js, Node.js, Express.js, PostgreSQL, and REST APIs, supporting loan access and onboarding for 100,000+ users.
- Designed backend architecture for loan onboarding, approval workflows, partner integrations, and user profile services using microservice-oriented Node.js modules, increasing approval throughput by 15%.
- Built and integrated REST APIs for financial workflows, third-party service calls, and internal business rules using Express.js and PostgreSQL, reducing loan journey latency by 30%.
- Created React.js dashboards and reusable UI components connected to backend APIs, improving user engagement by 30% within six months.
- Optimized PostgreSQL queries, indexes, and database access patterns for high-volume loan records, improving backend response consistency across peak usage periods.
- Containerized services with Docker and supported CI/CD pipelines through GitHub Actions and Jenkins, reducing deployment time by 40% and accelerating release cycles.
- Implemented JWT/OAuth authentication flows, API authorization checks, and secure data handling patterns for customer-facing fintech workflows.

EDUCATION

University of Mumbai - Master of Computer Applications (MCA)

Jan 2021 - Jul 2023

Maharashtra

PROJECTS

AI-Enabled Loan Management Dashboard

Feb 2023

- Built a full-stack loan management platform using React.js, Node.js, Express.js, PostgreSQL, and REST APIs, integrating AI scoring modules into backend workflows to improve loan approval efficiency by 15%.
- Dockerized application services, configured CI/CD pipelines, and implemented role-based dashboards with real-time notifications, increasing user engagement by 30%.

Real-Time Investment Dashboard

Aug 2022

- Developed a real-time investment dashboard using React.js, Node.js, Socket.IO, REST APIs, and PostgreSQL/MongoDB to stream portfolio updates and interactive analytics, improving tracking speed by 40%.
- Deployed Dockerized microservices through CI/CD pipelines and cloud-ready configuration, improving application availability by 25% for concurrent users.

AI-Powered Customer Support Chatbot

Jan 2021

- Built a Node.js chatbot backend with REST APIs and a React.js frontend to handle common customer queries autonomously, decreasing customer response time by 50%.
- Integrated MongoDB data storage, Redis-style session patterns, and Dockerized deployment workflows to deliver a responsive user experience and improve satisfaction score by 20%.

TECHNICAL SKILLS

Backend Development: Node.js, Express.js, NestJS, TypeScript, JavaScript, Python, Django, PHP, Java, REST APIs, Microservices, System Design

Frontend Development: React.js, Redux, Next.js, Vue.js, Tailwind CSS, HTML, CSS, React Native, Flutter

Databases: PostgreSQL, MongoDB, MySQL, Redis, Firebase, Supabase, Prisma, Database Migration, Database Optimization, SQL Optimization

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Cloud Deployment, Linux, Linux Shell Scripting

Security & Integration: JWT, OAuth, Authentication, Authorization, Payment Gateway Integration, API Integration, Webhooks, Socket.IO, GraphQL

Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Kafka, Pandas, NumPy
