

GANESH MISHRA

Backend Developer | Full Stack Developer

+91-7900173529 | ganeshkemoap123@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Available for immediate joining. Backend Engineer (3+ yrs) who has architected APIs powering 100,000+ users, cut API latency by up to 35%, and reduced feature delivery cycle time by 30% — across food delivery and fintech platforms.

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in Backend and Full Stack Development, building scalable systems across food delivery and fintech domains that now serve 100,000+ users, cut API latency by up to 35%, and reduced feature delivery cycle time by 30%. Hands-on experience designing REST APIs, microservices, database migrations, SQL optimization, JWT/OAuth authentication, real-time systems (Socket.IO), payment gateway workflows, and cloud deployment for production-grade platforms.

TECHNICAL SKILLS

Backend: Node.js, Express.js, NestJS, TypeScript, JavaScript, Python, Django, PHP, Java, REST APIs, Microservices, System Design

Frontend: React.js, Redux, Next.js, Vue.js, Tailwind CSS, HTML, CSS, React Native, Flutter

Stacks: MERN (MongoDB, Express.js, React.js, Node.js), PERN (PostgreSQL, Express.js, React.js, Node.js)

Databases: PostgreSQL, MongoDB, MySQL, Redis, Firebase, Supabase, Prisma, Database Migration, Database Optimization, SQL Optimization

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Cloud Deployment, Linux, Shell Scripting

Security & Integration: JWT, OAuth, Authentication, Authorization, Payment Gateway Integration (Razorpay), Vodafone Voice API, Webhooks, Socket.IO, GraphQL

Computer Science: Data Structures & Algorithms, OOP, DBMS, Kafka, Pandas, NumPy

EXPERIENCE

Backend Developer — Zenzio Technologies

Apr 2026 – Present

Puducherry, India

- Architected and built the backend from scratch for a multi-platform food delivery ecosystem (Customer App, Restaurant App, Delivery Executive App, Admin Portal) using NestJS, TypeScript, Python, and PostgreSQL — took the platform live from zero to production within 2 weeks, currently processing 5–15 orders/day in early rollout.
- Implemented real-time order tracking and live delivery status workflows using Socket.IO and event-driven backend design, synchronizing customers, restaurant partners, and delivery executives with sub-second updates.
- Integrated Razorpay for end-to-end payment handling and Vodafone's virtual number calling system to mask delivery executive and customer phone numbers during order calls, strengthening both payment reliability and user privacy in production.
- Managed Docker-based deployments and GitHub Actions CI/CD pipelines across Azure and AWS infrastructure, supporting continuous production releases for the 4-app platform (Customer, Restaurant, Delivery Executive, Admin).
- Developed React.js Admin Portal modules connected to backend APIs, enabling operations teams to manage restaurants, orders, delivery users, offers, banners, and platform analytics from a single interface. (Live: [zenzio-admin.vercel.app/dashboard](#))

Software Developer — Bigiota Analytics LLP

May 2025 – Nov 2025

Mumbai, India

- Developed and maintained a full-stack KYC and customer onboarding system for regulated financial workflows using the MERN stack, accelerating customer verification by 25%.
- Reduced onboarding errors by 30% through automated testing, monitoring, and workflow optimization, while maintaining regulatory compliance.
- Executed zero-loss data migrations across environments for critical customer records.
- Collaborated with 5+ cross-functional teams to deliver scalable solutions ahead of deadline, improving delivery efficiency by 20%.

Full-Stack Web Developer — Niyogin Fintech Ltd

May 2023 – Apr 2025

Vidyavihar, Mumbai

- Developed full-stack product features for the Niyoblu loan platform using React.js, Node.js, Express.js, PostgreSQL, and REST APIs, supporting loan access and onboarding for 100,000+ users.
- Built and integrated REST APIs for financial workflows and third-party service calls using Express.js and PostgreSQL, reducing loan journey latency by 30%.

- Containerized services with Docker and supported CI/CD pipelines through GitHub Actions and Jenkins, reducing deployment time by 40%.
- Created React.js dashboards and reusable UI components connected to backend APIs, improving user engagement by 30% within six months.
- Designed backend architecture for loan onboarding, approval workflows, and partner integrations using microservice-oriented Node.js modules, increasing approval throughput by 15%.
- Optimized PostgreSQL queries, indexes, and access patterns for high-volume loan records, improving backend response consistency during peak usage.
- Implemented JWT/OAuth authentication flows and API authorization checks for customer-facing fintech workflows.

PROJECTS

EdTech AI Learning Assistant — [Live Demo](#)

- Built an EdTech platform where students have real-time conversations with an AI tutor (OpenAI GPT-4 API) that explains topics in simple, layman terms.
- Developed the backend with Node.js, Express.js, and REST APIs, using MongoDB and PostgreSQL for data storage and conversation history.

Aurevia — Glassmorphism UI System — [Live Demo](#)

- Designed and built a modern UI system using glassmorphism principles, focused on smooth, polished visual interactions.
- Built the supporting backend with Node.js, Express.js, REST APIs, and MongoDB/PostgreSQL.

Billing & Receipt Management System — [Live Demo](#)

- Built a full-stack application for generating, storing, and managing billing receipts.
- Backend developed with Node.js, Express.js, REST APIs, and MongoDB/PostgreSQL for structured receipt records — built on a PERN-style architecture for the relational data layer.

AI Thumbnail Generator — [Live Demo](#)

- Built a tool that generates thumbnails from video content for social media use.
- Backend developed with Node.js, Express.js, REST APIs, and MongoDB/PostgreSQL for processing and storing generated assets.

Sales Research & Lead Management Platform — [Live Demo](#)

- Built a platform to manage sales lead generation and convert raw leads into a structured, trackable format.
- Backend developed with Node.js, Express.js, REST APIs, and MongoDB/PostgreSQL.

EDUCATION

Master of Computer Applications (MCA) — University of Mumbai

Maharashtra, India

Jan 2021 – Jul 2023
