# GANESH MISHRA

## FULL STACK DEVELOPER | BACKEND & FRONTEND ENGINEER

+91-7900173529 | ganeshkemoap123@gmail.com | Portfolio | LinkedIn | GitHub

**Available for immediate joining** | Full Stack & Backend Development | 3+ years experience

## PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in backend and full-stack development across food delivery, fintech, digital storefronts, and AI-powered applications. Experienced in building production web applications, REST APIs, real-time workflows, database integrations, and cloud deployments using Microsoft Azure and AWS. Focused on clean code, reliable integrations, performance optimization, and end-to-end feature delivery.

## TECHNICAL SKILLS

**Frontend:** React.js, Redux, Next.js, Vue.js, Tailwind CSS, HTML5, CSS3, React Native, Flutter

**Backend:** Node.js, Express.js, NestJS, TypeScript, JavaScript, Python, Django, PHP, Java, REST APIs

**Databases:** PostgreSQL, Azure Database for PostgreSQL, MongoDB, MySQL, Redis, Firebase, Supabase, Prisma

**Cloud & DevOps:** Microsoft Azure, AWS, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Linux, Shell Scripting

**Security & Integration:** JWT, OAuth 2.0, Authentication/Authorization, Razorpay, Vodafone Voice API, Webhooks, Socket.IO, GraphQL

**Other:** Microservices, System Design, OOP, DBMS, Kafka, Pandas, NumPy, Unity, C#

## PROFESSIONAL EXPERIENCE

### Backend Developer — Zenzio Technologies
**Apr 2026 – Present**
Puducherry, India

- Architected and built backend services from scratch for a multi-platform food delivery ecosystem (Customer, Restaurant, Delivery, Admin Portal) using NestJS, TypeScript, Python, and PostgreSQL; launched the platform from zero to production in two weeks.
- Engineered real-time order tracking and delivery-status workflows using Socket.IO and event-driven backend design.
- Integrated Razorpay payment handling and Vodafone virtual-number calling to mask customer and delivery-executive phone numbers.
- Managed Docker-based deployments and CI/CD pipelines across Microsoft Azure and AWS infrastructure.
- Developed React.js Admin Portal modules connected to backend APIs for managing orders, partners, delivery users, offers, and platform analytics.

### Software Developer — Bigiota Analytics LLP
**May 2025 – Nov 2025**
Mumbai, India

- Developed and maintained a full-stack KYC and customer-onboarding system for financial workflows using the MERN stack, accelerating customer verification by 25%.
- Configured Azure Blob Storage for customer documents and supported backend services on Azure App Service.
- Reduced onboarding workflow errors by 30% through testing, monitoring, and workflow optimization.
- Executed data migrations across environments and collaborated with cross-functional teams using Agile practices.

### Full-Stack Web Developer — Niyogin Fintech Ltd
**May 2023 – Apr 2025**
Vidyavihar, Mumbai, India

- Developed full-stack features for the Niyoblu loan platform using React.js, Node.js, Express.js, PostgreSQL, and REST APIs, supporting 100,000+ users.
- Built REST APIs for financial workflows and partner integrations, reducing loan-journey latency by 30%.
- Containerized services with Docker and supported CI/CD pipelines using Azure DevOps and GitHub Actions, reducing deployment time by 40%.
- Designed backend modules for loan onboarding, approval workflows, and partner integrations using microservice-oriented architecture.
- Optimized PostgreSQL queries and indexes, and implemented JWT/OAuth authentication and authorization.

## SELECTED PROJECTS

**Unity Solar Panel Simulation — Unity & C#**

- Developed a solar-panel simulation demo featuring a 3D panel model, sunlight direction, panel rotation, and energy-output visualization.
- Role: Full Stack Developer, with Unity and C# project work.

**GHD AUS — Gaming Project | Frontend Development**

- Frontend development for a gaming project.
- Role: Frontend Developer.

**Blastix Esports India — Gaming Project | Full-Stack Development**

- Full-stack development for a gaming/esports project.
- Role: Full Stack Developer.

**Dukaan Digital — Digital Storefront & E-Commerce Platform**

- Built a responsive storefront for local businesses to manage online catalogs, WhatsApp ordering, and customer engagement.
- Implemented features including WhatsApp commerce automation, GST invoicing, a digital credit ledger, appointment booking, and multilingual UI using React, Vite, and Tailwind CSS.
- Containerized the application using Docker and Nginx and configured CI/CD deployment pipelines.

**EdTech AI Learning Assistant**

- Built an interactive learning platform with real-time AI tutor conversations powered by the OpenAI API.
- Developed a Node.js/Express.js backend with REST APIs and PostgreSQL/MongoDB for conversation state and history.

**Aurevia — Glassmorphism UI System**

- Designed and built a glassmorphism-based UI system focused on polished visual interactions.
- Built supporting Node.js/Express.js REST APIs connected to MongoDB and PostgreSQL.

**Billing & Receipt Management System**

- Built a full-stack application for generating, storing, and managing billing receipts and customer invoices using a PERN-style architecture.

**AI Thumbnail Generator**

- Created a tool for generating custom social-media thumbnails from video content, with backend services for processing and managing generated assets.

**Sales Research & Lead Management Platform**

- Built a platform to aggregate sales leads and organize them into structured, trackable workflows, supported by backend REST services.

## EDUCATION

**Master of Computer Applications (MCA)** — University of Mumbai

Maharashtra, India | Jan 2021 – Jul 2023
